ADDICTION RECOVERY CENTER ADDS SECOND CLINIC

ST. LOUIS, MO, OCTOBER 28, 2009: Assisted Recovery Centers of America, Mid West (ARCAMW) opened a second clinic. Located in the Chesterfield Valley area of western St. Louis the treatment center is conveniently located at the intersection of I-64/40 and Boones Crossing (exit 17).

Percy Menzies, M. Pharm., RSAP, founded ARCAMW in response to the growing need for effective addiction treatment, especially opioid drugs like VICODIN, OXYCONTIN and heroin. Menzies attributes the success of ARCAMW to their non-traditional approach of treating clients on an outpatient basis, helping them to live with their addictions in their normal environment. This approach is not only cost effective but allows patients to rehabilitate in complete confidentiality.

ARCA specializes in the outpatient treatment of addictive disorders through a combination of anti-craving medication, non-

12-Step counseling and psychiatric treatment, which allows patients to return to work within days.

The ARCA program utilizes evidence-based treatment which includes FDA-approved medications like SUBOXONE, naltrexone and VIVITROL.
